PROFILE

I'm making the jump into Software engineering as it's always been a passion of mine, making something from nothing with just some lines of code. I have a strong customer service background and therefore great communication skills which lends themselves well to working with clients and teams in a very cohesive fashion. I have also been involved in team sports such as hockey and football, so I understand that there's no "I" in team.

SKILLS

HTML, CSS, Sass, JavaScript, Node, React, Express, MySQL, Agile Development, Document Object Model (DOM), APIs, Web APIs, User Authentication, OAuth, Heroku, GitHub, Jest

EXPERIENCE

Web Developer | Rije Studios

MAY 2022 - PRESENT, OTTAWA, ON

- Worked closely with clients every step of the way to bring their dream website to fruition.
- Worked with React, HTML, Sass, JavaScript and Node to create dynamic and functioning websites.
- Created UX design with Figma to reflect client wishes.

Security Guard | VxL Enterprises

APR 2014 - 2022, OTTAWA, ON

- Coordinated between guard force and client with strong communication.
- Have led guards during events to ensure client satisfaction.
- Created a strong sense of teamwork amongst peers to create a thriving environment for everyone.

EDUCATION

BrainStation | Diploma, Software Engineering

NOV 2022 - FEB 2023, ONTARIO, CA

Codecademy | Certificate, Web Developer

DEC 2021 - MARCH 2022, OTTAWA, ON

PROJECTS

Trivia Trial (In charge of API and JavaScript)

DEC 2022, HACKATHON

- Created event handlers for when correct or incorrect answers are picked as well as loading the next question.
- Worked Closely with fellow Software Designers and created a fun and productive workspace.
- Led the presentation and delivered a concise explanation and interactive demo for the audience to be involved.

Book Bazaar

FEB 2023, CAPSTONE PROJECT

- Created database of authors and books with MySQL.
- Used Express and Knex to grab all data from server side.
- Used Stripe API to accomplish shopping cart and checkout.
- Used React and Sass to create front-end as well as user Authentication on login and signup.

Air Canada

FEB 2023, INDUSTRY PROJECT

- Worked closely with UX Designer and Data Scientist from beginning to end.
- Helped create back-end functionality using Express and Knex.
- Implemented Front-end design using React with Sass
- Helped create the logic throughout the application
